

Awareness Course

SAFE USE OF POWER TOOLS

Many job roles involve the use of power tools. All people using equipment at work must be adequately trained to ensure health and safety in its use.

This course provides a complete introduction to the safe operation of power tools so you can learn about the legislation and safe working practices when using power tools in the workplace.

The course can be tailored to suit specific sectors/job roles.

What's Covered?

- Legislation & Regulations
- Pre-use checks, maintenance & storage
- Risk assessments
- HAVS (Hand & Arm Vibration Syndrome)
- PPE (Personal Protective Equipment)
- Safe operation of power tools
